

## Letter of confirmation

This confirmation letter is part of the tesa Terms and Conditions of Purchase. It must be signed and returned to the ordering party before the order is accepted.

## Safety rules for contractors

For work performed by external contractors, tesa has developed summary "Safety Rules for Contractors". These safety rules must be recognized as binding by contractors before they are awarded a contract and must be observed during the execution of the contract. tesa reserves the right to update the "Safety Rules for Contractors" as necessary, in the event of changes in legal requirements or new safety aspects.

## Confirmation by the contractor

We have taken note of the "Safety rules for contractors tesa plants Germany" (Document ID NP00220720, Version 04) and recognize them as binding for the current and future execution of orders at the German tesa operating sites.

We will ensure that personnel deployed by us, and any subcontractors are made aware of the safety rules prior to order execution and observe them during order execution.

We acknowledge that future updates of the tesa safety rules, which tesa transmits to us, require a renewed confirmation.
