

51912 PV11

Product Information

Repulpable, Double-Sided Splicing Tape

Product Description

tesa® 51912 is a double-sided repulpable tape consisting of a tissue paper and a modified water soluble acrylic adhesive.

tesa® 51912 features especially

- High tack properties
- Very good adhesion values on coated and uncoated papers
- Very high shear strength
- Very good heat resistance
- Good repulpability over full pH-range (pH3 –pH9)

Colour: Blue, Colourless

Product Features

- The patented calcium resistant adhesive (CaRes) for a maximised life time of permanent splices on papers containing calcium carbonate (CaCO₃)
- Very high shear strength
- Very high heat resistance
- Very good adhesion values even on heavier paper grades
- Good tack properties
- tesa® CaRes 51912 is certified by independent laboratories for: Repulpability according to TAPPI UM-213 over full pH-range (pH3 – pH9)
- Paper from well-managed certified forests and other controlled sources

Applications

tesa® 51912 is particularly suitable for

- Permanent overlapped splices

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Applications

• Backing	non-woven	• Total thickness	90 µm
• Type of adhesive	repulpable tackified acrylic	• Color	blue
• Type of liner	repulpable siliconised paper
