Precise masking for extremely flat, razor-sharp paint and varnish edges

CAN BE
USED
OUTSIDE
FOR
8 WEEKS

- › Thin and tear-resistant
- › Easy, quick and safe handling
- › Residue-free removal for up to 26 weeks indoor and 8 weeks outdoor
- › Very supple
- › Can be used with low-solvent paints, glazes (VOC standard), silicate and limewash paints

Where? On smooth and lightly textured surfaces

Why? Translucent backing enables accurate positioning, consistent adhesive guarantees perfect results

Result Flat, razor-sharp paint edges

This product is also available as
tesa Easy Cover® 4365 on page 12.

Dimensions and packaging

m:mm	50:9	50:19	50:25	50:30	50:38	50:50

PU/Pallet	75	80	80	80	80	80

tesa® Precision Mask® Standard 4344

Professional masking for sharp edges
when using paint or varnish

- Clean paint edges
- Transparent and easy to reposition
- Residue-free removal for up to 3 months indoor and 4 weeks outdoor

Where? Smooth and lightly textured surfaces

Why? Thin, flat paper backing guarantees great results and residue-free removal

Result Sharp paint and varnish edges

Also available as tesa Easy Cover® 4401, 4402 and 4451 on pages 13/14.

Dimensions and packaging

m:mm	50:19	50:25	50:30	50:38	50:50
Rolls IP/PU	8/48	6/36	5/30	4/24	3/18
PU/Pallet	80	80	80	80	80

tesa® Precision Mask® Sensitive 4333

For demanding paint work on sensitive
surfaces

- Low Tack Masking Tape
- Easy to use
- Thin and tear-resistant
- Residue-free removal, even from sensitive surfaces such as various wallpapers and freshly painted surfaces

Where? On smooth, sensitive surfaces such as decorative wallpaper, veneer skirting boards and coatings that have not completely dried

Why? Unharmful sensitive surfaces and extra sharp paint edges

Result In-tact surfaces and extra-sharp, precise varnish and paint edges

Dimensions and packaging

m:mm	50:19	50:25	50:30	50:38	50:50
Rolls IP/PU	8/48	6/36	5/30	4/24	3/18
PU/Pallet	70	70	70	70	70

tesa® High-Performance Mask 4338

Smooth masking tape for demanding paint masking applications

- Strong adhesion, good binding of paints and fillers
- High tear resistance
- Bright green colour is extremely visible
- Easy to tape curves

- Where?** On all stable surfaces (not for sensitive surfaces such as wallpaper, veneer skirting boards, old paintwork)
- Why?** Strong adhesion for up to 6 drying cycles
- Result** Precise paint and varnish edges on straight lines, curves and cambers

Dimensions and packaging

m:mm	50:19*	50:25*	50:30*	50:38*	50:50*
Rolls IP/PU	16/96	12/72	10/60	8/48	6/36
PU/Pallet	24	24	24	24	24

*without printed label

tesa® Profi PLUS Masking Tape 4306

For optimal paint edges of long, straight lines

- Convenient, fast masking
- Easy, clean removal
- Accurate results
- Can be used for 14 days indoors and 3 days outdoors

- Where?** Smooth and lightly textured surfaces
- Why?** High handling comfort due to smooth paper backing and easy removal
- Result** Optimal paint edges

Dimensions and packaging

m:mm	50:19	50:25	50:30	50:38	50:50
Rolls IP/PU	16/96	12/72	10/60	8/48	6/36
PU/Pallet	36	36	36	36	36

Pro Tip

Choosing the correct tape

Each application presents its own specialised requirements for adhesive tapes. That's why it's important to know about the kind of surface, the working environment and the duration of use before choosing and applying a masking tape.

Consider the following when choosing your product:

- **What is the surface like?**
Different tapes are optimised for smooth, lightly textured or rough surfaces.
- **Will the tape be used indoors or outdoors?**
Each tape reacts differently to temperature, weather and UV-exposure.
- **How long will the tape remain on the surface?**
Not every tape can or should be applied indefinitely.
- **What work will be performed while the tape is in place?**
Paint application and demanding applications such as plastering work require specially designed tapes.

tesa® Painter's Tape

4348

Universal application—
for all standard masking jobs

- > Good initial tack
- > Tear-resistant and slightly stretchy
- > Good adhesive properties
- > Can be used indoors for 7 days

Where? Smooth and lightly textured surfaces

Why? Ensures good adhesion

Result Good paint and varnish edges

Also available as tesa Easy Cover®
4364 and 4368 on pages 14
and 15.

Dimensions and packaging

m:mm	50:19	50:25	50:30	50:38	50:50
Rolls IP/PU	16/96	12/72	10/60	8/48	6/36
PU/Pallet	36	36	36	36	36

tesa® Silicone Masking Tape 4331

Sharp paint edges on siliconised surfaces

- > Very high stability and tear resistance
- > Suitable for plaster and sandblasting work
- > High heat-resistance
- > Supple
- > Easy to remove

Where? On siliconised surfaces, paints treated with anti-mold ingredients and vinyl

Why? Normal adhesive tapes will not adhere to these surfaces

Result Strong adhesion, flush paint and varnish edges

Dimensions and packaging

m:mm	50:19*	50:25*	50:30*	50:38*	50:50*
Rolls IP/PU	16/96	12/72	10/60	8/48	6/36
PU/Pallet	32	32	32	32	32

*without printed label

Pro Tip

Use on special surfaces

Outdoor plastic surfaces can age significantly as a result of weather and environmental conditions. PVC windows and door frames often develop a brittle, chalky surface. Avoid creating noticeable streaks when removing the tape. We recommend testing an area beforehand using a strip of transparent tesa[®]film: apply firmly to the surface and remove quickly. The residues on the tesa[®]film provide information about the degree of weathering of the material and any dirt stuck in the pores.

Our recommendation:

- Perform an adhesion test with transparent tesa[®]film.
- Advise that it may not be possible to carry out professional adhesion on these surfaces.
- Offer cleaning of the profile as an additional service.

Anti-adhesive surfaces, sealants and silicone profiles, Teflon, polyethylene and polypropylene are often found outdoors. For these applications you will need specialty adhesive tapes.

tesa® Masking Tape for Curves 4319

Masking of curves and creative wall design

- › Very supple and flexible
- › Easily torn by hand
- › Excellent adhesion
- › High adhesion on rough surfaces
- › Always apply stretched to avoid colour bleed

Where? Smooth to rough surfaces

Why? The tape can be easily applied to curves or cambers

Result Curves taped quickly in one operation

Dimensions and packaging

m:mm	50:19*	50:25*	50:30*	50:38*	50:50
Rolls IP/PU	16/96	12/72	10/60	8/48	6/36
PU/Pallet	16	16	16	16	16

*without printed label

tesa® Fibreglass Tape 60101

Sealing of joints, holes and cracks in drywall

- › Light adhesion
- › Repositionable
- › High tear-resistance

Where? At panel joints and repair points

Why? The fibreglass cloth tape adheres equally well to most surfaces – even rough surfaces

Result Flush fillings without cracks

Dimensions and packaging

m:mm	25:48	45:48	90:48	45:100
Rolls IP/PU	–/48	–/48	–/48	–/24
PU/Pallet	36	24	24	24

This product is also available as tesa® Precision Mask® 4334 on page 6.

Extremely sharp edges & large-area protection in one step

- › Combination of translucent, supple film and tesa® Precision Mask 4334 PLUS
- › Suitable for airless applications
- › Flat, sharp paint and varnish edges
- › Residue-free removal for up to 6 months indoor and 8 weeks outdoor

Where? Smooth and lightly textured surfaces indoors and outdoors

Why? Translucent backing enables good positioning, uniform adhesion guarantees perfect results

Result Razor-sharp, flat paint and varnish edges and a clean working area

Dimensions and packaging

m:mm	33:550	33:1400	33:2100	17:2600
Rolls IP/PU	8/64	8/32	8/32	8/32

tesa Easy Cover® Spray

4451

Fast masking protection for spray applications

- Double taped for efficient and secure masking
- Residue-free removal for up to 3 months indoor and 4 weeks outdoor
- Suitable for airless applications

Where? Handrails, window sills, door frames, stair stringers and skirting boards

Why? Time-saving large-area masking and protection in one step

Result Flush and precise paint edges

Also available as tesa® Precision Mask® Standard tesa® 4344 on page 7.

Dimensions and packaging

m:mm	25:200
Rolls IP/PU	10/20
PU/Pallet	48

tesa Easy Cover® Universal

4368

Fast, large-area protection with clean paint edges

- tesa® Painter's Tape quality
- Secure hold due to 19 mm wide adhesive strip
- Embossed film for secure binding of paints

Where? Smooth and lightly textured surfaces

Why? This 2-in-1 solution enables time-saving large-area masking and protection in one step.

Result Sharp paint edges and a clean working area

Also available as Painter's Tape tesa® 4348 on page 8.

Dimensions and packaging

m:mm	33:300	33:550	33:1100	33:1400	33:1800	33:2100	17:2600

PU/Pallet	24	24	36	36	36	36	36

Correct application

No matter how good our tapes are, if you ignore the condition and cleanliness of the application surface, the quality of the bond can suffer considerably. Contamination from dust, moisture, grease or oils is critical and should definitely be removed.

Pro Tip

Clean surface = good adhesion

Dirty surface = poor adhesive contact due to e.g. dust, moisture, oils or grease

Important: press firmly!

It is also important to press down firmly on the edge of the tape when applying. For reliably perfect masking results and clean paint edges without leaks or bleeds.

Another important factor is the ambient temperature during application. The range from 5 °C to 40 °C is ideal for adhesion. During the colder months, the adhesive tapes should be stored at a moderate temperature (> 15 °C). Adhesion is significantly reduced at lower application temperatures. For extreme applications, the winter tapes Premium Plastering Tape 4843 and PE Plastering Tape 4845 (page 24) can be used at 0 °C or -15 °C.

Ideal temperature range

tesa® Easy Cover® Paper

4364

Large-area masking and protection for painting and spray painting

- > Specially coated paper binds paint and varnishes
- > Combination of special high-quality paper and tesa® Masking Tape

Where? Smooth and lightly textured surfaces

Why? This 2-in-1 solution enables time-saving large-area masking and protection in one step.

Result Clean paint and varnish edges, reliable binding of paint to the protective paper

Also available as
Painter's Tape tesa®
4348 on page 8.

Dimensions and packaging

m:mm	25:180	25:300
Rolls IP/PU	10/40	10/20

CAN BE USED
OUTSIDE FOR
6 MONTHS

- › Thin, tear-resistant specialty paper
- › Supple and reliable
- › Semi-transparent for exact positioning
- › UV-resistant for 26 weeks
- › For door and window frames as well as shutters
- › Surfaces such as PVC (including old PVC), glass, aluminium, anodised aluminium, wood and lightly textured surfaces (e.g. mortar and grout)

- Where?** Smooth and lightly textured surfaces
- Why?** Highly weatherproof and UV-resistant adhesive and backing material
- Result** Easy removal without unwanted tearing

This product is also available as tesa Easy Cover® 4411 on page 19.

tesa Easy Cover® UV Precision

4411

Time-saving large-area protection in one step

- Ideal for door and window frames as well as shutters
- Specially designed for surfaces such as PVC, glass, aluminium and wood
- Sharp and precise paint edges for even more precision
- Suitable for airless applications
- UV-resistant for 26 weeks

Where? On smooth and lightly textured surfaces outdoors

Why? This practical 2-in-1 solution is suitable for several working stages thanks to its 26 weeks of UV-resistance

Result Clean, sharp paint and varnish edges

Dimensions and packaging

m:mm	33:550	33:1400	17:2600
Rolls IP/PU	8/64	8/32	8/32
PU/Pallet	18	18	24

tesa® UV Surface Protection Tape

4438

For painting, varnishing and light plastering work

- Moisture-resistant, stable backing material
- Weather resistant, resilient to aging
- UV-resistant for 12 weeks
- Easily removable
- Also suitable for natural, varnished or stained wooden surfaces

Where? Smooth and lightly textured surfaces such as wooden beams in lattice frameworks (e.g. clay plaster)

Why? Particularly suitable for outdoor painting jobs, external insulation protection, facade renovation and use with water-soluble acrylic paints

Result Clean, straight paint & varnish edges with particularly stable surface protection

tesa® Cloth Duct Tape UV Extra 4370

Reliable long-term protection of valuable surfaces

- › UV-resistant for 8 weeks
- › Strong adhesion even on rough surfaces
- › Easy to tear by hand
- › Extremely tear-resistant
- › Easy, clean removal
- › Mesh: 70 threads/inch²

- Where?** Smooth and sensitive surfaces such as window frames and facade elements as well as concrete blocks
- Why?** Specially developed for facade renovations, plaster and gypsum
- Result** Optimally protected surfaces

Also available as tesa Easy Cover® 4373 on Page 22.

tesa® Plastering Cloth Tape UV 4363

Reliable protection of valuable surfaces

- › UV-resistant for 3 weeks
- › Strong adhesion even on rough surfaces
- › Easy to tear by hand
- › Waterproof and usable from 5 °C
- › Easy to remove
- › Mesh: 65 threads/inch²

CAN BE USED OUTSIDE FOR 3 WEEKS

- Where?** Smooth and sensitive surfaces such as window frames and facade elements
- Why?** Perfect protection of sensitive surfaces, e.g. in construction work
- Result** Well-protected surfaces

Also available as tesa Easy Cover® 4369 on page 23.

Colours		

tesa® s-PVC Plastering Tape Embossed 67001

Protection during painting and plastering work

- UV-resistant for 6 weeks
- Application from +5 °C to +60 °C
- Suitable for smooth and lightly textured surfaces
- Embossed backing for straight, hand-torn edges

Where? Components such as windows and facade elements

Why? Quick and clean 90° angle tears due to embossed grooved backing

Result Precisely masked plaster surfaces

Pro Tip

Bonding to metal and natural stone

On these surfaces, the use of adhesive tapes often leads to discolouration and unwanted residues.

Metal surfaces

Chemical reactions often occur after using adhesive tapes on metal surfaces, especially in combination with copper, zinc and lead. The tape may therefore only be applied for a short time. Choose a narrow adhesive tape and do not cover the entire surface.

Use a porous covering material (e.g. covering fleece) to avoid waterlogging and subsequent discoloration.

Anodised aluminium finishes

Removal of adhesive tape can often leave residues on anodised surfaces of inferior quality (e.g. window and door profiles, roller shutters and rails). Test the adhesive tape on a small area or perform the "ink test" beforehand: Dampen the surface with an ink-soaked rag. If ink residues remain visible after a second wiping-over, the surface is poorly sealed.

In that case, it is recommended using high-quality adhesive tapes such as tesa® 4331 or tesa® 4440.

Artificial and natural stone

The use of adhesive tapes is generally not recommended for these surfaces. Problems occur frequently. Cover these surfaces with porous fleece or plywood panels instead.

tesa® Double-Sided Masking Tape

4836

Masking and protection of large areas outdoors

- › Double-sided adhesive
- › UV-resistant for 6 weeks
- › Residue-free removal
- › Secure hold of the protective film
- › Practical, double-sided tack
- › Exercise caution with old PVC, as discolouration may occur

- Where?** On window frames and other valuable components
- Why?** Allows customised masking for the protection of sensitive surfaces
- Result** Efficient masking and protection of large areas

Dimensions and packaging

m:mm	25:25
Rolls IP/PU	12/48
PU/Pallet	32

tesa® Surface Protection Film

4848

Masking and protection of windows and construction elements

- › Fast, easy handling
- › Resistant to moisture, mechanical damage and many chemicals
- › Environmentally friendly PE-film
- › UV-resistant for 4 weeks
- › Not for use on weathered plastic, old paintwork, coated glass panes or raw metal. In these cases, we recommend tesa® 4373 and 4440.

- Where?** On smooth surfaces such as glass, frames and similar surfaces
- Why?** Protection of sensitive surfaces at temperatures from -10 to +60 °C
- Result** Sturdy protection for large areas

tesa® Premium Cloth Tape 4651

Repairing, fixing, bundling and marking in industry and trades

- › Extremely tear- and abrasion-resistant
- › Can be written on
- › Universal adhesive
- › Protection against sharp-edged objects (occupational safety)
- › Weatherproof, flexible
- › Temperature resistant up to 130 °C
- › Mesh: 148 threads/inch²

Where? Smooth and rough surfaces

Why? The Premium Cloth Tape is suitable for a variety of jobs in all trades

Result Outstanding results thanks to universal suitability

Dimensions and packaging

Fastening, sealing, bundling

- Very strong adhesion
- Extra tear-resistant, better removability
- Sticks to rough surfaces thanks to the thick layer of adhesive
- Mesh: 34 threads/inch²

- Where?** Rough surfaces such as brick, concrete, plaster and heavy tarpaulin
- Why?** Versatile applications: Fastening, sealing, bundling, etc.
- Result** Secure hold, even on difficult, dirty surfaces

Dimensions and packaging

m:mm	50:48
Rolls IP/PU	–/24
PU/Pallet	24
Colours	■

Pro Tip

The perfect peel

Four factors contribute to perfect removal:

- 1. The right angle** Always pull at an acute angle to the surface. Ideally at a 45° angle.
The larger the angle, the higher the risk of residues remaining on the surface.
- 2. The right speed** Never pull off suddenly! Work slowly and steadily to minimise the risk of tearing or leaving behind adhesive residues.
- 3. The right ambient temperature** The surface temperature should be at least 5 °C, otherwise the backing material and adhesive will become brittle. This increases both the tape's tendency to tear and the risk of adhesive residues.
- 4. The right time** Ideally immediately after the paint has set, but before it has fully dried.

Ideal trigger angle

Critical: Angle is too large.
Risk of adhesive residues.

tesa® PRO Strong Duct Tape

74662

Adhesion where other tapes do not hold

- › Strong adhesion, also on rough surfaces
- › Easy to tear by hand
- › Easy to unroll
- › Easily tearable by hand with a straight tear-off edge
- › Comfortable handling
- › Mesh: 27 threads/inch²

- Where?** On smooth and textured surfaces in the construction trade, e.g. concrete and masonry (important: always perform a test adhesion)
- Why?** Outstanding adhesion, can also be used on slightly dusty surfaces
- Result** Secure adhesion

Dimensions and packaging

tesa® Extra Strong Floor Laying Removable 51960

Laying of textile carpets and PVC flooring

- Hand-tearable
- Nearly residue-free removal
- Suitable for underfloor heating (temporarily 120 °C, permanently 60 °C)
- Solvent and plasticiser free
- Suitable for CV and PVC

- Where?** For use on all common floorings (including parquet), except natural and artificial stone
- Why?** Largely resistant to aging and plasticisers (no discolouration of PVC/CV floorings)
- Result** Securely fixed carpets and floorings, residue-free removal

Dimensions and packaging

m:mm	10:50	25:38*	25:50
Rolls IP/PU	6/36	8/48	6/36

*without printed label

tesa® Universal Double-Sided Removable 4939

Powerful adhesion of carpets for e.g. trade fairs and exhibitions

- Hand-tearable
- Nearly residue-free removal
- Differential adhesion

- Where?** For use on all common floors, except natural/artificial stone and PVC/CV coverings
- Why?** High initial adhesion, removable nearly residue-free for up to 14 days
- Result** Securely fixed carpets and floorings

Dimensions and packaging

m:mm	10:50	25:50
Rolls IP/PU	6/36	6/24

Clean

tesa® Extra Strong Floor Laying Permanent 4944

For the laying of textile carpets, including needlefelt carpets

- Hand-tearable
- Can also be used on heavily textured carpet backings

Where? Can be used on all common floors, except natural/artificial stone and PVC/CV coverings

Why? Especially suitable for rough and fibrous surfaces

Result Securely fixed floor coverings

Dimensions and packaging

m:mm	10:50	25:50
Rolls IP/PU	6/36	6/24

tesa® Universal Double-Sided Permanent 64620

Universal tape for securing carpets and rugs

- Hand-tearable
- Fast, safe and easy adhesion
- Solvent-free
- Ideal for smooth carpet backings

Where? For use on all common floors, except natural/artificial stone and PVC/CV coverings

Why? The adhesive tape is characterised by its high tack

Result Permanently secured carpets

Dimensions and packaging

m:mm	10:50	25:50	50:50*
Rolls IP/PU	6/36	6/24	1/24

*without printed label

For heavy objects

EXTREMELY STRONG

- > Ultra-strong hold of up to 10 kg per 10 cm of tape
- > For flat objects up to 10 mm thick
- > Ideal both indoors and outdoors*
- > Quick attachment with no waiting time

- Where?** On tiles, painted wood and most plastics
- Why?** The strongest double-sided adhesive tape from tesa®
- Result** Reliable hold even for heavy objects

Dimensions and packaging		
m:mm	1.5:19	5:19
Rolls IP/PU	12/72	10/60

*Not UV-resistant; no direct contact with water

Pro Tip

Drill-free mounting

Thanks to the mounting tapes from tesa®, you can dispense with drill, rawlplugs and screws and avoid damage to hanging surfaces.

Applying the mounting tapes is simple and easy: After four quick steps, your objects can enjoy a firm, reliable hold!

Clean the surface with denatured alcohol or window cleaner to remove dust and grease. Wait for the surface to dry before applying the mounting tape.

Apply each strip of tape vertically to the object.

Press down firmly with your fingers: Optimum adhesive strength is reached after five seconds of pressure.

Remove the protective film from the adhesive surface. Note: Please do not touch the exposed adhesive surfaces as this may affect the performance of the adhesives.

tesa® PRO Mounting
ACX^{plus} MP

66728

For high-end adhesion

- Industrial quality: Acrylate foam with "ACX^{plus} MP" technology
- Sealing function with protection against dust and moisture
- Withstands temperature changes and temperatures from 5 to 200 °C
- Resistant to moisture, (certain) chemicals, plasticisers and UV light

Where? For mounting of materials with different surface properties

Why? Secure and permanent adhesion due to viscoelasticity

Result Powerful, durable bonds

Dimensions and packaging

m:mm	1.5:19	5:19
Rolls IP/PU	10/60	10/60

tesa® PRO Mounting Mirror 66952

For mirrors and flat objects

- Long-term adhesion of mirrors (up to 70 × 70 cm and 4 mm thick)
- Adheres to tiles, painted wood, veneer, glass, steel and many metals and plastics
- Also bonds rough with smooth surfaces

Where? Ideal for bathrooms and similarly humid rooms

Why? Resistant to aging and moisture

Result Strong hold, including on tiles and glass

Dimensions and packaging

m:mm	1.5:19	5:19	10:19
Rolls IP/PU	12/72	16/96	16/96

tesa® PRO Mounting Transparent 66965

Near invisible attachment

- Transparent, double-sided adhesive tape
- Strong and extra thin: only 0.2 mm thick
- Long-term temperature resistance up to 100 °C
- Ideal for smooth surfaces such as glass or tiles

Where? For flat objects indoors and outdoors

Why? Resistant to moisture, plasticisers and UV light

Result Impressive, nearly invisible adhesion

Dimensions and packaging

m:mm	1.5:19	5:19	25:19
Rolls IP/PU	12/72	12/72	8/48

tesa® PRO Mounting Outdoor 66751

For outdoor installations

- Double-sided tape for secure attachments outdoors
- Adheres to tile, metal and most plastics
- Strong and weather resistant

Where? Outdoors
Why? Waterproof, UV and temperature-resistant
Result Strong adhesion of up to 1 kg per 10 cm of tape

Dimensions and packaging

m:mm	15:19	5:19
Rolls IP/PU	12/72	10/60

tesa® PRO Mounting Slim 66714

For cable ducts and decorations

- Only 9 mm wide
- Strong hold on both sides
- Partially conformable to the surface

Where? On various indoor surfaces
Why? At only 9 mm thick, ideal for floor slabs or cable ducts
Result Fast, permanent hold

Dimensions and packaging

m:mm	2x5:9
Rolls IP/PU	10/60

tesa® PRO Mounting Wallpaper & Plaster 66743

For textured, sensitive surfaces

- › Professional mounting tape for wallpaper & plaster
- › Permanent hold on textured surfaces
- › For flat objects up to 10 mm thick

- Where?** On textured, sensitive surfaces
- Why?** Specially designed adhesive tape structure evens out irregularities
- Result** Perfect hold on plaster and wallpaper (except vinyl and textile wallpapers)

Dimensions and packaging		
m:mm	1.5:19	5:19
Rolls IP/PU	10/60	10/60

tesa® PRO Mounting Universal 66958

All-rounder for indoor use

- › Double-sided mounting tape with foam backing
- › For lighter objects such as imitation stucco and skirting boards
- › Evens out slightly rough surfaces
- › Hand-tearable

- Where?** On smooth and lightly textured surfaces
- Why?** Conformable foam backing with good shear strength
- Result** Reliable hold for lighter objects

Dimensions and packaging		
m:mm	1.5:19	5:19
Rolls IP/PU	12/72	8/48

Pro Tip

Optimal storage

Even when not in use, you can ensure that your adhesive tapes will be able to perform their best. Proper storage maintains quality. Important aspects: Storage temperature and duration.

Choose your product taking into consideration the following points:

- Adhesive tapes age much faster at higher storage temperatures. They should not, for example, be stored behind windscreens. High temperatures cause damage such as degradation of the adhesive, which can lead to increased adhesive residue upon removal.
- Adhesive tapes that have been stored too long or incorrectly can easily damage the surfaces to which they are applied.
- If rolls of adhesive tape are too warm or cold for application after storage, care should be taken to allow their temperature to adjust to the ambient temperature (10 – 20 °C) before use. This is particularly important for applications during frost or high temperatures.

tesa® PRO Mounting PE 66957

Durable mounting

- › For a variety of applications both indoors and outdoors
- › Strong, immediate adhesion
- › Waterproof, UV-resistant, non-aging, excellent cold shock absorption
- › For various surfaces, including glass

Where? For POS and trade fair sample displays, shelf labels, cable ducts, glazing bars and window strips

Why? Instant hold with maximum power

Result Reliable mounting, robust hold

Dimensions and packaging

m:mm	25:12	25:19
Rolls IP/PU	–/24	–/16

tesa® Spray Glue Permanent 60020/21

Versatile, for permanent adhesion

- › Fast and precise adhesion of large areas
- › Fast-drying, moisture-resistant
- › Resistant to mechanical and thermal stress

Where? On many materials, e.g. paper, cardboard, felt, fabric, films, foils, wood, leather etc.

Why? Strong, economical adhesion due to easy dosing

Result Strong, durable bonds

Dimensions and packaging

ml	300	500
Pieces IP/PU	–/12	–/12

tesa® Spray Glue Extra Strong 60022

Extra strong adhesion on rough and uneven surfaces

- › Strong bonds and good temperature resistance
- › Good adhesion on non-polar surfaces
- › Adjustable spray widths
- › Thick adhesive stripe with minimal excess atomisation

Where? On many materials, e.g. plastic, insulation, vinyl, imitation leather, carpet and rubber

Why? The vario nozzle allows regulated spray both vertically and horizontally

Result Especially strong, permanent bonds

Dimensions and packaging

ml	500
Pieces IP/PU	–/12

tesa® Industry Cleaner 60040

Cleaning and preparation of surfaces before adhesion

- Smells pleasant, evaporates without leaving any residue
- Dissolves stubborn soiling such as wax, oil, grease and silicone residues

- Where?** Glass, metal surfaces (e.g. machine parts)
plastics (check for tolerance before use)
- Why?** The spray can be applied to hidden, hard-
to-reach places
- Result** Clean surfaces

Dimensions and packaging

ml	500
Pieces IP/PU	–/12

tesa® Adhesive Remover 60042

Removal of adhesive residues

- Smells pleasant, evaporates without leaving any residue
- Reliably removes residues from e.g. labels and adhesive
tapes as well as grease, tar, resin and other soiling

- Where?** Glass, metal and plastic surfaces
- Why?** Excellent cleaning of machines and many
other surfaces
- Result** Reliable removal of the most stubborn
adhesive residues

Dimensions and packaging

ml	200
Pieces IP/PU	–/12

MARKING & INSULATION

It's essential to mark and secure working areas and hazard zones. Our solutions are quick and impossible to overlook.

tesa® Anti-Slip Tapes 60950/51/52/53

For the non-slip finishing of treads

- Resistant to UV, temperature, (salt) water and detergents
- Particularly abrasion-resistant, durable and robust
- Excellent hold

- Where?** On steps, ladders, ramps etc.
- Why?** Anti-slip adhesive tapes guarantee a safe step where there is a risk of slipping
- Result** Non-slip, colour-marked treads

tesa® Marking Tape Permanent 4169

High-quality, robust and durable floor markings

- High adhesive strength, UV and weather resistant
- Sturdy and robust PVC carrier, forklift-safe
- Can be used as floor marking or warning tape, depending on colour choice

- Where?** Smooth and lightly textured floors, such as transportation routes and play areas
- Why?** Fast, visible demarcation of indoor and outdoor work areas
- Result** Reliable, stable floor markings

tesa® Signal Tape Non-adhesive 58137

Cordon off of construction sites or hazardous areas

- › Red and white printing on both sides
- › UV-stable for 3 months
- › Robust PE-film
- › Recyclable

- Where?** Construction sites, unfinished entrances, or around newly sown lawns
- Why?** Quickly mark and cordon off closed areas
- Result** Clearly marked/ visible hazard zones and restricted areas

Dimensions and packaging

m:mm	100: 80
Rolls IP/PU	4/20
Colours	

tesa® Xtreme Conditions 4600

Fast repair of leaks and insulation of lines

- › Instant hermetic sealing
- › Self-welding
- › Dielectric strength: 8,000 volts
- › Can also be used under water
- › Extremely resistant to chemicals and liquids, UV-radiation and high/low temperatures

Where? Various blunt surfaces, including oily, dirty or wet surfaces

Why? The flexible silicone tape fits to surfaces perfectly

Result Permanent, absolutely secure seals

Dimensions and packaging

m:mm	3:25	10:25	10:50
Rolls IP/PU	–/16	–/7	–/3

tesaflex® Premium Multi-purpose Tape 4163

For insulation and marking of electrical installations

- › Strong adhesion
- › UV and temperature-resistant (up to 105 °C)
- › Dielectric strength: 7,000 volts
- › Resistant to acids and solvents

Where? All common cable materials and cores

Why? Universal repair and multi-purpose tape

Result Clearly visible markings

tesaflex® Electrical Insulation VDE/IEC 53988

Electrical installation and repair work

- High breakdown voltage: up to 7,000 volts
- Temperature resistant up to 90 °C
- Available in nine different colours
- Certificates: IEC 60454-3-1, VOC and others

- Where?** On all common cable materials and steel – even at low temperatures
- Why?** Thick backing material, high flexibility and excellent adhesive performance
- Result** Safe insulation of cables of all kinds, clear markings and strong cable bundles

Dimensions and packaging

m:mm	10:15	10:19	20:19	25:19	33:19	25:25	25:50
Rolls IP/PU	10/250	10/250	10/200	10/200	10/200	10/200	4/64
Colours							

tesa® Vapour Barrier Tape 60077

For vapour barriers, overlaps, joints and seams

- Extremely high adhesion
- Extremely resistant to aging
- Simple, efficient and time-saving to use
- Certified according to Emicode EC1+, DIN 4108, RI.SE (P-Mark) and SINTEF

- Where?** On most vapour barrier films for new construction or roof renovation
- Why?** For the permanent sealing of overlaps, joints, etc.
- Result** Secure, long-lasting bonds

Dimensions and packaging

m:mm	50:50
Rolls IP/PU	–/12

tesapack® PVC Premium 4124

Sealing medium-weight to heavy shipping boxes

- › Strong adhesion, extremely tear-resistant
- › Especially robust film backing
- › Quiet unrolling

Where? Universal use on cardboard boxes of all kinds

Why? Universally applicable, by hand or machine

Result Reliable sealing of boxes

Dimensions and packaging

m:mm	66:50
Rolls IP/PU	6/36
PU/Pallet	40
Colours	

tesapack® PVC Comfort 4100

Universal PVC packaging tape with embossed film

- › Quiet and even unrolling
- › Highly suitable for machine handling
- › For all common hand dispensers

Where? On light and medium-weight cardboard boxes

Why? Very high initial adhesion enables fast bonding

Result Well-sealed shipping boxes and bundles of all kinds

Dimensions and packaging

m:mm	66:50
Rolls IP/PU	6/36
PU/Pallet	40
Colours	

tesapack® PP Universal 4024

Sealing light to medium-weight shipping cartons

- › Quiet unrolling
- › Solvent-free
- › Very high resistance to UV, aging and temperature
- › Excellent hold

- Where?** On light and medium-weight cardboard boxes
- Why?** Very high initial adhesion enables fast bonding
- Result** Well-sealed shipping boxes and bundles of all kinds

Dimensions and packaging

m:mm	66: 50
Rolls IP/PU	6/36
PU/Pallet	66

tesapack® COMFORT Hand Dispenser 6400

For the safe and convenient handling of packaging tape rolls

- › Stable metal body
- › Adjustable roller brake
- › Concealed cutting edge (injury protection)
- › Soft rubber grip for comfortable handling

- Where?** For all types of packages
- Why?** The robust and comfortable hand dispenser enables a professional, efficient working process
- Result** Perfectly sealed packages

Dimensions and packaging

mm	Packaging tape up to 50 mm wide
Rolls IP/PU	1/20

tesa® Masking Tape 4323

Easy, uncomplicated painting jobs at moderate temperatures

- Flat and lightly creped
- Paper backing with natural rubber adhesive
- Use for up to 3 days

- Where?** Simple masking and protection, bundling, packaging, marking, lightweight fixing and interior decoration
- Why?** Practical adhesion for simple, uncomplicated paint jobs at moderate temperatures
- Result** Good paint edges for standard applications

Dimensions and packaging

tesa® Easy Cover Standard 4403/4405

Quick and inexpensive masking and protecting of large areas

- › For indoor applications
- › Clean paint edges
- › For smooth and lightly textured surfaces
- › Standard film with a thickness of 8 µm
- › Standard paper with a thickness of 40 g/m²

- Where?** Secure on flat surfaces such as skirting boards, window sills, stairs and furniture
- Why?** The practical 2-in-1 solutions tesa® Easy Cover Standard 4403 and 4405 save time and money
- Result** Simple handling and clean paint edges

tesa® Basic Duct Tape 4610

Simple cloth tape with good adhesive properties

- › High initial adhesion
- › Easily torn by hand
- › Good adhesion to various materials
- › Easy to unroll
- › Mesh: 18 threads/inch²

- Where?** Universal use in industry and trades
- Why?** This basic duct tape offers good adhesion to various surfaces
- Result** Secure hold, even on challenging, e.g. dirty, surfaces
