

## tesa® 60408 – Bio-based paper packaging tape

We help our customers achieve their sustainability goals with new products!

### Sustainability contribution

- 92% bio-based carbon content in total product (certified by DIN-CERTCO)
- Paper backing made with paper from well-managed FSC™-certified forests and other controlled sources (FSC™ C148769)
- Recycling-friendly tape according to INGEDE Method 12
- Solvent-free production process

### Product performance

- Premium paper packaging tape for medium-weight cartons (up to 20 kg)
- Suitable for manual and automatic applications
- Reliable sealing on various cardboards
- Printable solution for advertising and brand showcase purposes

## Responsibly sourced and bio-based materials in one packaging tape

Good packaging that does its job well adds value to any product. For many years, secure packaging was the sole requirement for ensuring that a product reaches its destination safely. Nowadays, packaging must not only protect its content, whether for storage or transport, but it must also contribute to sustainability as well. Our new tesa® 60408 meets these two requirements.

### Contributing to sustainability

The backing of our new tesa® 60408 is made with paper from well-managed FSC™-certified forests and other controlled sources (FSC™ C148769). For this product, not only the backing material is made from renewable resources. The adhesive system used is also made almost entirely from renewable feedstocks. In addition to natural rubber, a natural-based resin is also used, which almost completely replaces the use of fossil-based materials. Thanks to the smart choice

of raw material for this product and thanks to its innovative product design, our new tesa® 60408 has a total bio-carbon content of 92% (certified by DIN-CERTCO).

Last but not least, this product can be disposed of together with the cardboard in the paper bin without disturbing the recycling process and the production process of this product is solvent-free.

### Original product design

tesa® 60408 is a bio-based paper packaging tape featuring a premium kraft paper backing and a solvent-free natural rubber adhesive system. The tear-resistant backing is made with paper from well-managed certified forests and other controlled sources. The natural rubber adhesive chosen for this product provides a good adhesion and initial tack on a

wide variety of different carton qualities. The combination of the certified paper backing and the solvent-free natural rubber adhesive makes this product the perfect solution for packaging applications up to 20 kg. tesa® 60408 can be used with manual and automatic applications and it can be printed with all types of inks.

Paper from well-managed FSC™-certified forests and other controlled sources
