

tesa® 4914

Low VOC

Product Information

Double-sided non-woven tape with differential adhesive

Product Description

tesa® 4914 is a translucent double-sided self-adhesive tape consisting of a non-woven backing and a tackified acrylic adhesive with lower coating weight on the open side.

tesa® 4914 features especially:

- Open side: lower adhesion level
- Easier removal while tearing the bond apart from the original surface even after exposure to demanding environmental conditions
- Covered side: higher adhesion level
- Foamed adhesive coating with high initial tack
- Excellent performance on rough surfaces

Product Features

- Asymmetrical product design with superior adhesion on liner-covered side
- Excellent performance on rough surfaces like leather and textiles
- Reliable bond, often also on low surface energy surfaces
- Low VOC according to VDA278 analysis
- Flame retardant according to FAR/JAR/CS 25.853(a) Appendix F part I (a)(1)(ii)

Application Fields

- Mounting of car roof linings in car production
- Lamination of foamed materials in combination with smooth materials on the open side
