

# **Product Information**

### 50µm double sided translucent non-woven tape

#### **Product Description**

tesa® 8853 is made from special tackified acrylic adhesive system which has excellent high temperature resistant property, ideal for demanding FPC mounting applications.

#### **Product Features**

- The acrylic adhesive gives this product an excellent temperature resistance up to 260°C.
- The highly comfortable ultra thin non-woven backing offers excellent converting performance with limited edge picking.
- The temperature resistant glassine liner ensures it can be easily released without adhesive residue left after solder reflow process.
- Sufficient holding power and peel strength even after solder reflow process
- Excellent die-cutting properties and very low oozing due to special backing
- High tensile strength
- High aging resistance
- Conforming to RoHS
- High conformability for uneven surfaces

# **Application Fields**

FPC mounting application of electronic components, subjected to high temperature processing and operating environments.
