

tesa® 60347

Product Information

30 µm single sided best conductivity & Low Activation Pressure electrically conductive fabric tape

Product Description

tesa® 60347 is best conductivity & Low Activation Pressure electrically conductive fabric tape. It consists of electrically conductive fabric backing and specially designed single sided conductive adhesive coating layer. Designed for EMI shielding for display, antenna and other components applications.

Product Features

- High and stable electrical conductivity
- Good peel adhesion level
- Excellent electrical conductivity in XYZ-direction even under low lamination pressure process
- Excellent EMI shielding performance

Application Fields

- Shielding & grounding of components with high and stable conductivity needs
- Shielding of pressure sensitive components
- FPC on OLED Display
- Antenna at curved display edge

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction

- | | | | |
|--------------------|--------------------|----------------------|-------------|
| • Backing material | conductive woven | • Colour | grey |
| • Type of adhesive | conductive acrylic | • Colour of liner | transparent |
| • Type of liner | PET film | • Thickness of liner | 50 µm |
| • Total thickness | 30 µm | | |

Properties/Performance Values

- | | | | |
|--|---------|--|---------|
| • Contact resistance z-direction (2kg) | 26 mOhm | • Joint resistance x-y-z-direction (50g) | 41 mOhm |
| • Contact resistance z-direction (50g) | 32 mOhm | • Release of liner | easy |
| • Joint resistance x-y-z-direction (2kg) | 38 mOhm | | |

tesa® 60347

Product Information

Adhesion to Values

- | | | | |
|------------------------------|----------|------------------------------|----------|
| • Steel (2kg; after 14 days) | 5.1 N/cm | • Steel (50g; after 14 days) | 4.8 N/cm |
| • Steel (2kg; initial) | 4.3 N/cm | • Steel (50g; initial) | 3.5 N/cm |

Additional Information

- tesa method: tested by 4mm x 4mm tesa jig

Disclaimer

tesa® products prove their impressive quality day in, day out in demanding conditions and are regularly subjected to strict controls. All information and recommendations are provided to the best of our knowledge on the basis of our practical experience.
