

PLATE MOUNTING JUST GOT EASIER

Experience smooth and trouble-free plate mounting with our new tesa® Softprint FE-X EA Series for easy application

Our new tesa® Softprint FE-X EA is specially developed for easy tape handling to reduce waste, save time, and further improve productivity in your print room. Micro channels within the adhesive ensure effortless air removability during plate mounting and printing. Our state-of-the-art FE-X adhesive reliably holds the plate edges down while making the plate-demounting process quick and painless. The improved surface makes product handling even more convenient.

- **Unique liner structure** helps air to escape during mounting and printing
- **FE-X adhesive** prevents plate lifting while allowing easy plate repositioning and demounting
- **Improved product surface** ensures smooth manual tape mounting process
- **High quality components** deliver consistent and excellent print results
