

tesa® 6090

Product Information

Manual bench dispenser for two rolls

Product Description

The tesa® 6090 dispenser is universally applicable for two rolls of tesa® tape in 66 m, up to 25 mm width. For this reason it can be used with different tesa® tapes at the same time (e.g. filmic tapes or packaging tapes of different widths and colours, or with various imprints). An additional advantage is the smooth blade which gives a straight, clean cut. For this reason the dispenser is frequently used for lithographic tapes.

Application Fields

Because of its sturdy construction and its non-slip base, an additional fastener is not required. The chosen tape is pulled off and cut along the blade.

Properties/Performance Values

- Roll width max. 25 mm
