

tesa® 4378 Easy Cover® Auto

Product Information

'3 in 1' Car body masking solution for large areas

Product Description

tesa® 4378 Easy Cover® Auto is a convenient "3 in 1" solution for the masking of large areas for car body repair. The convenient system includes:

1. Masking tape tesa® 4309
2. Masking paper border
3. HDPE masking film

The main advantage is the combination of the advantages of the single components.

- a) tesa® 4309 is a finely creped, extremely stretchable and flexible paper masking tape. It is suitable for water and solvent based paints and can be used for paint spraying with subsequent oven/ or IR-drying up to a temperature of 120 °C.
- b) The additional paper edge provides perfect paint absorption on the most critical area close to the repair.
- c) The HDPE film serves for the protection against spray particles. It is specifically treated for better paint adherence. Due to the high static the film clings to the car body.

Easy Cover® Auto allows a single person to cover large areas easily and quickly. For storing, transporting and disposing off tesa® Easy Cover® Auto is very space saving.

Application Fields

Masking of large areas before paint jobs in car body repair shops.

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction
