

# tesa® 6081 SPOOL DISPENSER

With tesa® Dispensers Your Production Processes Will Be Optimized

We offer a complete solution to your production process. Our dispenser can be mounted easily to a specific bag sealer or mounted on a tape dispenser rack independent of the bag sealer.

- Unwind tape from spools in a controlled way. Guide the tape precisely and without damage to the lamination unit.
- The brake and buffer system allows a high lamination speed and compensates for variations in line speed due to e.g. cutting processes.
- Easy operation and little set-up time translates into efficient processes.
