

tesa CaRes® 51455 PV11

Product Information

Repulpable, single-sided splicing tape

Product Description

Product Description

tesa CaRes® 51455 is a single-sided repulpable splicing tape, with a liner consisting of a flat-back paper and a modified water soluble acrylic adhesive.

tesa CaRes® 51455 special features:

- The patented calcium resistant adhesive (CaRes) for a maximised life time of permanent splices on papers containing calcium carbonate (CaCO₃)
- slit liner for easier manual splice application
- Thin but strong backing to allow a low total splice thickness
- Printable and coatable backing for easy further processing
- Very high shear strength
- Very high heat resistance
- Very good adhesion values on most paper grades

tesa CaRes® 51455 is certified by independent laboratories for:

- Repulpability according to TAPPI UM-213 over full pH-range (pH3 – pH9)

Application Fields

tesa CaRes® 51455 is particularly suitable for:

- Manual permanent butt-splicing

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction

- | | | | |
|--------------------|------------------------------|-------------------|------------------------------|
| • Backing material | flat paper | • Type of liner | repulpable siliconised paper |
| • Type of adhesive | repulpable tackified acrylic | • Total thickness | 80 µm |

Properties/Performance Values

- | | | | |
|--------------------------|----|--------------------------------|---------|
| • Temperature resistance | ++ | • Tensile strength (crosswise) | 30 N/cm |
|--------------------------|----|--------------------------------|---------|

Additional Information

Other products for butt-splicing:

- tesa® 51444 - reduced thickness for thinner splices
