

# tesa CaRes<sup>®</sup> 51913 PV11

## Product Information

Repulpable, double-sided splicing tape

## Product Description

tesa CaRes<sup>®</sup> 51913 is a thin double-sided repulpable tape consisting of a tissue paper and a modified water soluble acrylic adhesive.

tesa CaRes<sup>®</sup> 51913 special features:

- The patented calcium resistant adhesive (CaRes) for a maximised life time of permanent splices on papers containing calcium carbonate (CaCO<sub>3</sub>)
- Very high shear strength
- Very high heat resistance
- Very good adhesion values on most paper grades

tesa CaRes<sup>®</sup> 51913 is certified by independent laboratories for:

- Repulpability according to TAPPI UM-213 over full pH-range (pH3 – pH9)

## Application Fields

tesa CaRes<sup>®</sup> 51913 is particularly suitable for

- Permanent overlapped splices
- Core starting
- Manual as well as automatic application

## Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

## Product Construction

- |                    |                              |                   |                              |
|--------------------|------------------------------|-------------------|------------------------------|
| • Backing material | non-woven                    | • Type of liner   | repulpable siliconised paper |
| • Type of adhesive | repulpable tackified acrylic | • Total thickness | 65 µm                        |

## Properties/Performance Values

- Temperature resistance ++

## Additional Information

Other products for permanent overlapped splicing:

- tesa<sup>®</sup> 51912 - better bonding on heavier paper grades
