tesa® 50600 Standard

product information

Green polyester/silicone masking tape

tesa® 50600 is a green-translucent, high-temperature masking tape featuring a polyester backing with a silicone adhesive. tesa® 50600 is used for various applications, especially for masking during powder-coating processes or bonding and splicing applications of non-polar material. The tape enables sharp color edges and offers excellent paint anchorage. The masking tape’s silicone adhesive system makes the tape extremely heat-resistant, withstanding extreme temperatures of up to 220°C/428°F for as long as 30 minutes at a time. The high-temperature tape features easy application and easy one-piece removal without leaving residues behind. tesa® 50600 masking tape is also available in a version with a liner.

Main Application

- tesa® 50600 is used for masking off areas that are to be protected during powder-coating processes
- The high-temperature tape can withstand temperatures of up to 220°C/428°F for 30 minutes
- tesa® 50600 is used for bonding and splicing applications of non-polar material
- The masking tape features residue-free removal
- tesa® 50600 is also available on a special PET liner

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Technical Data

- Backing material: PETP
- Total thickness: 80 µm
- Type of adhesive: silicone
- Elongation at break: 110 %
- Tensile strength: 75 N/cm
- Temperature resistance: 220 °C

Adhesion to

- steel: 4.0 N/cm, 36.5 oz/in

Properties

- Hand tearability: Yes
- Easy to remove: ••••
- Paint anchorage: ••••
- Sharp colour edge: ••••
- Conformability: ••

Evaluation across relevant tesa® assortment: •••• very good ••• good •• medium • low

Additional Information

tesa® 50600 is also available on a special PET liner.
