## Adhesion Promoter Fast Cure

### Product Information

Fast-curing surface treatment to improve adhesion to various substrates

### Product Description

tesa<sup>®</sup> Adhesion Promoter 60153 Fast Cure can be used to improve the adhesion of tesa's superior pressure-sensitive adhesive tapes (especially tesa<sup>®</sup> ACX<sup>plus</sup>) on various substrates including PP/EPDM, which is very common in the automotive industry. The UV-traceability of this adhesion promoter allows easy quality control during the application process.

### Application Fields

This adhesion promoter is recommended for PP/EPDM, even on ribbed surfaces, which are often found on components/parts within the automotive industry. This product can be used to significantly improve the bonding strength of tesa<sup>®</sup> ACX<sup>plus</sup> tapes (testing shows significantly higher peel adhesion values).

### Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

### Product Construction

- Colour yellow

### Product Assortment

- Available colors yellow

### Properties/Performance Values
