Smart decoration

Clever: Thanks to the new tesa Glue Stamp ecoLogo® with a bit of silk paper a simple lamp can be transformed swiftly into a unique design object. It looks great during the day, as well as in the dark.

How to do it right!

WE NEED:

- › desk lamp, silk paper, ruler, cutting pad, pencil, cutter, triangle template (21 cm x 3 cm), tesa Glue Stamp ecoLogo®

THE CREATIVE IDEA:

- › Create a triangle stencil according to the required measures. Cut off a piece of silk paper and fold it into several layers. Place the stencil on the paper and trace triangles with the pencil.
- › Cut out the triangles using the ruler and the cutter. Repeat step 1 and 2 until you've created enough triangles for your lamp.
- › Now apply glue on the upper center of the triangles using the glue stamp.
- › Glue the triangles on the lamp shade next to each other. Start on the lower bottom. Press firmly. Place the rows at a distance of 4 cm, in a shifted position. Glue the last row twice on top of each other, so the light shines evenly through the lamp screen

LIGHT ON!

tesa Glue Stamp ecoLogo®
 The glue stamp makes gluing even easier: Position it, press it down and - voilà - you've applied a double-sided adhesive pad. Scrap-booking, gift wrapping or creative decoration - there are no limits to your creativity.
