The tesa SE building complex in Norderstedt

The tesa SE building complex in Norderstedt, which was dedicated in early 2016, combines the company’s headquarters and research and technology center in a single facility. At 160 million euros, it was the largest investment in the company’s history. There are currently more than 1,000 employees working at the site on Hugo-Kirchberg-Strasse. (©tesa SE. Industry – Wearables

Smartwatch lens mounting

The cover (the lens) of a smartwatch must be bonded to the housing with the utmost precision during the manufacturing process. The tape (red) has to meet a wide range of requirements, providing high adhesive strength, shock resistance, and resistance to chemical substances.

Smartwatch sensor mounting

The housing of a smartwatch contains a large number of highly sensitive electronic components that are bonded together using adhesive tape. tesa produces its high-tech tapes in different thicknesses in the cleanroom unit at the Hamburg-Hausbruch plant.

Fitness tracker and die-cut

Small adhesive area, big performance: The die-cuts used in fitness trackers need to be resistant to exposure to various substances, including sunscreen and soap. The tesa product range currently comprises four double-sided adhesive tapes ranging in thickness from 50 to 250 micrometers.
