

# **Product Information**

# 1,000µm single sided grey electrically conductive foam tape

## **Product Description**

tesa<sup>®</sup> 60216 is a grey single sided electrically conductive self adhesive foam tape. It consists of a highly compressible electrically conductive foam backing and an electrically conductive adhesive.

#### **Product Features**

- Thickness: 1,000 μm
- Highly compressible foam backing with low closure force and reliable recovery properties
- Excellent conformability to surface variations and tolerances
- Excellent electrical conductivity over a wide working range in XYZ-direction even at high temperatures and humidity
- High adhesion level even at harsh environmental conditions
- Excellent shock absorbing and cushioning properties
- High stability of the foam to avoid flaking of particles

#### **Application Fields**

- EMI shielding and grounding applications
- Electrostatic discharge applications

## Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

## **Product Construction**

<ul><li>Backing</li><li>Type of adhesive</li><li>Type of liner</li><li>Total thickness</li></ul>	conductive foam conductive acrylic PE-coated paper 1000 μm	<ul><li>Color</li><li>Color of liner</li><li>Thickness of liner</li></ul>	gray white/blue logo 120 μm
--	---	---	-----------------------------------

#### **Properties/Performance Values**

•	Contact resistance z-direction	0.03 Ohm / square •	Surface resistance x-y-direction	0.2 mOhm
	(initial)	inch •	Temperature resistance short	200 °C
•	Release of liner	easy	term	

## **Adhesion to Values**

Steel (after 14 days)
8.5 N/cm

<sup>2</sup>age 1 of 2 – as of 17/02/24 – en-US
