

# tesa® 60295

## **Product Information**

## 50µm d/s SMT resistant electrically conductive non-woven tape

## **Product Description**

tesa® 60295 is a double sided electrically conductive self adhesive tape. It consists of an electrically conductive non-woven backing and an electrically conductive acrylic adhesive.

Color: Grav

#### **Product Features**

- Thickness: 50µm
- · Excellent electrical conductivity in XYZ-direction even at high temperature and humidity
- · Good adhesion level even at harsh environmental conditions
- Excellent conformability and adjustment to uneven surfaces
- Smooth liner removability even after several times of high temperature processing

# **Application Fields**

- · Flexible PCB and modules for shielding and grounding
- Electrostatic discharge applications
- EMC applications, such as grounding and shielding

## Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

#### **Product Construction**

•	Backing	conductive non-	•	Color	gray
		woven	•	Color of liner	white/red logo
•	Type of adhesive	conductive acrylic	•	Thickness of liner	70 μm
•	Type of liner	glassine			
•	Total thickness	50 μm			

# **Properties/Performance Values**

•	Contact resistance z-direction	0.02 Ohm / square •	Surface resistance x-y-direction	0.2 mOhm
	(initial)	inch •	Temperature resistance short	260 °C
•	Release of liner	easy	term	
	Static shear resistance at 40°C	very good		

#### Adhesion to Values

Steel (after 14 days)
7 N/cm

tesa® 60295
