

# tesa® 60703

## Product Information

15µm ultra-thin double-sided black copper tape

### Product Description

tesa® 60703 is an ultra-thin, double-sided black copper tape designed for FPC and display module applications. It features a differential design with black and transparent adhesives on each side of the copper backing, ensuring stable fingerprint sensing performance and strong component fixation for high-quality module integration.

### Product Features

- Ultra-thin design
- Excellent bonding strength
- High quality in appearance
- Good reworkability

### Application Fields

- Mounting on display module for light blocking
- Ultrasonic sensor application

### Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

### Product Construction

- |                    |             |                      |       |
|--------------------|-------------|----------------------|-------|
| • Backing          | copper film | • Total thickness    | 15 µm |
| • Type of adhesive | acrylic     | • Color              | black |
| • Type of liner    | PET film    | • Thickness of liner | 50 µm |

### Adhesion to Values

- |                   |          |
|-------------------|----------|
| • Steel (initial) | 4.5 N/cm |
|-------------------|----------|
