

Let's bring sustainability and reliability together.

Stronger carton sealing.

Less virgin plastic.

Makes sense.

tesa® More sustainable packaging tapes

Less virgin plastic. Zero compromise.

Our new innovative packaging tapes offer the strength and reliability you expect from tesa, yet are also more sustainable. High adhesion, with silent unwinding capabilities, ensures reliability for heavy weight cartons. For high volume, medium weight boxes, an innovative and cost-effective solution you can rely upon.

More sustainable choice

Our new **tesa® 60416** and **tesa® 60418** tapes are part of a portfolio to meet various demands.

The proven acrylic adhesive in **tesa® 60416** ensures a load capacity of **30kg** loads. It's also resistant to high temperatures and can be unwound silently to protect your workforce from excessive noise.

The **tesa® 60418** is made with thin PET which is stronger than traditional BOPP and can handle a **25kg** load. Good value for money, its longer roll length, easy unwinding and high tack capabilities maximize efficiency.

Our reliable adhesive solutions include paper-based tapes, so you can find the right solution for your needs.

Product	% less virgin plastic	Load capacity	Key features
tesa® 60416	55%	30kg	Resistant to high temperatures Silent unwinding capabilities
tesa® 60418	60%	25kg	Longer roll length Easy unwinding, high tack

*60416 contains 55% overall post-consumer recycled content. 60418 contains 60% overall post-consumer recycled content.
