

tesa® 58314

Product Information

25 µm PP tape for in-cell applications in EV batteries

Product Description

tesa® 58314 is a light blue, linerless 25 µm Polypropylene (PP) tape with an acrylic adhesive.

It is designed for applications inside EV battery cells, offering electrolyte resistance and a PP backing. The 25µm thin construction supports a reduction in passive materials, enabling a more efficient and compact cell architecture. Its linerless design minimizes waste and supports an efficient application process.

Product Features

- Electrolyte resistance
- 25µm thin construction
- Linerless design

Application Fields

- Jelly-Roll Fixation
- Stack Fixation
- Cell-Tab Protection

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction

- | | | | |
|--------------------|---------|-------------------|-------|
| • Backing | PP film | • Total thickness | 25 µm |
| • Type of adhesive | acrylic | | |

Properties/Performance Values

- | | | | |
|-----------------------|---------|--------------------------|-----|
| • Elongation at break | 150 % | • Electrolyte resistance | yes |
| • Tensile strength | 30 N/cm | | |

Adhesion to Values

- | | |
|---------|----------|
| • Steel | 1.3 N/cm |
|---------|----------|
