tesa® ALUMINIUM FOIL TAPES

Our Specialists for Pipes, Cables and Insulation for Industry and Trade
Our solutions for the industrial use

tesa® offers a complete new line of aluminum foil tapes, specifically engineered to meet the toughest requirements of the HVAC, metal construction, electrical and household appliance industries. The new range is characterized by high thermal resistance, durability and conductivity and can help increase efficiency and meet sustainability goals by minimizing air distribution loss.

Product features:
• Electrically and thermally conductive, heat and light reflective
• Barrier against moisture, gas and vapor
• Aging resistant and strong adhesive, suitable for permanent applications
• Resistant to oil and acids, temperature resistant from -40°C to 160°C
• Flame retardant according to DIN 4102, class B1 and B2 and the requirements of UL510A
• Meets the requirements of UL723
• Thickness deviation < ±10%
• Aluminum alloy 8011, temper O: Al content of 98.7% w/w

Areas of application:
• For permanent use when fastening, sealing, protecting and repairing
• Bonding of cooling lines and coils in the household appliance industry
• Joining and sealing of thermal insulation, ducts and pipes
• Repairs on trucks, RV’s and trailers
• Sealing of heating and ventilation systems as well as rain gutters
• To make substrates electrically and thermally conductive
• To reflect heat radiation
