

tesa® 52310 PV7 100µm Filmic tape

tesa® 52310 PV7 is a 100µm thick filmic double sided tape specially suitable for compressible sleeves and thin plates (.045" or 1,14mm) in flexographic printing.

The unique properties of tesa® 52310 PV7 1000µm make it the ideal choice for high quality printing, easier demounting of plates without damaging them and clean removal from the sleeves without leaving residues.

Adhesive properties

- Secure bonding to sleeve, with specially enhanced removal properties allowing easy demounting of the plate
- Specially enhanced removal properties of the tape allowing the tape to be removed without leaving residues.

Additional properties

- The structured PP-liner prevents the formation of air pockets during plate mounting

Main Application

The mounting of thin flexographic printing plates (<1,70mm / <.067") on compressible sleeves

Technical Data

| | | | |
|----------------------|----------|--------------------|----------------|
| ▪ Backing material | PVC film | ▪ Type of adhesive | natural rubber |
| ▪ Thickness category | 100 µm | ▪ Type of liner | PP |

Additional Information

52310 PV7 has been designed for the mounting of thin flexographic printing plates on compressible sleeves allowing easier demounting of the plates and residue free removal.
