

tesa® 52332

Plate mounting in flexographic printing, especially corrugated board postprint

tesa® 52332 is specially designed for demanding plate mounting applications, especially where high adhesion is required and where plates are mounted permanently. This is often the case in corrugated board postprint where plates are commonly mounted to e.g. Mylar sheets and hung vertically when stored.

- tesa® 52332 is ageing resistant
- tesa® 52332 has an embossed PP-liner to prevent the formation of air bubbles during plate mounting

Main Application

tesa® 52332 is a plate mounting tape for flexographic printing, especially well suited to permanent mounting applications in corrugated board postprint.

Technical Data

- | | | | |
|----------------------|----------|--------------------|-------------------|
| ▪ Backing material | soft PVC | ▪ Type of adhesive | tackified acrylic |
| ▪ Thickness category | 300 µm | ▪ Type of liner | PP |
