

“START AND YOU’LL BE CONVINCED!”

Joscha Schmidt, Technical Procurement
Heyne & Penke Verpackungen GmbH

Heyne & Penke Verpackungen GmbH will continue to rely on standardization and sustainability with tesa Twinlock®.

One of Germany’s leading manufacturers of flexible paper and film packagings will further equip its production of food and non-food packaging material with tesa Twinlock®. Established in 1906, Heyne & Penke Verpackungen GmbH has been utilizing flexographic printing for more than forty years and – as full-service provider – provides its customers an extensive range of flexible packaging products.

Since 2014, they have successfully used tesa Twinlock®. We asked Joscha Schmidt, Technical Procurement, what were the reasons behind considering in tesa Twinlock®.

“Years ago, we were one of the first printing companies in Germany to invest in tesa Twinlock®. The critical factors were the improvement in print quality and process stability thanks to the high degree of standardization from tesa Twinlock®. Also, sustainable, eco-friendly, and resource conserving manufacturing is a top priority for us!

Heyne & Penke Verpackungen GmbH is already well positioned having purchased additional tesa Twinlock® sleeves with frequently recurring repeats and when they need new sleeves they will invest in tesa Twinlock®.
