

# TRANSFER TAPE FOR LIGHTWEIGHT MOUNTING APPLICATIONS

The Tackified Acrylic Transfer Tape  
tesa® 75507 Offers a Range of Benefits

- **Suitable for a wide range of applications** due to its very good initial adhesion to a wide variety of surfaces
- **High durability** as it is temperature, humidity and ageing resistant
- Equipped with our **proven and well-known** tesa® 4965 adhesive

# DURABLE AND CONFORMABLE FOR ALL KINDS OF MOUNTING AND LAMINATION WORK

## Application areas:

- Mounting of lightweight parts and materials
- Mounting of foams, felts, fabrics and textiles
- Mounting of flooring systems
- Membrane switch mounting
- Lamination of insulation materials
- Splicing

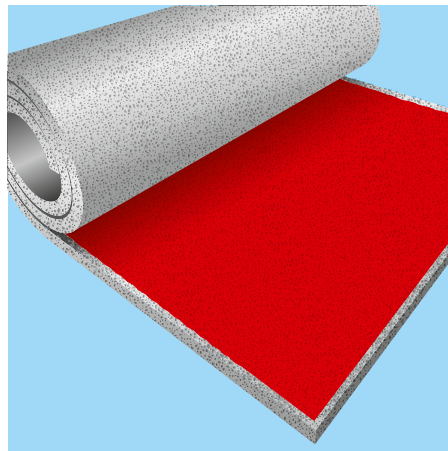

## Product features:

- Transfer tape design makes it highly conformable and suitable for a wide range of applications
- Very good initial adhesion to a wide variety of materials
- High durability due to its very good temperature and humidity resistance
- Good die cutting properties

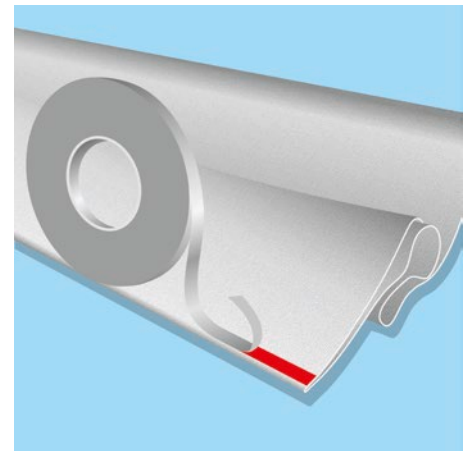

## References for applications

Leightweight mounting

Foam lamination

Fabric and textile mounting

## Technical data

| Product     | Backing | Type of adhesive  | Color       | Type of liner | Total thickness [μm] | Thickness of liner [μm] | Adhesion to steel [N/cm] | Dimensions (m:mm) |
|-------------|---------|-------------------|-------------|---------------|----------------------|-------------------------|--------------------------|-------------------|
